Real Estate Investing for Nurses

## Welcome, Nurse Investor!

### Mindset Shifts – From Overworked Nurse to Wealthy Investor

Nurses are trained to work hard—but investors learn to work smart.

- Old Mindset: “I have to work more hours to make more money.”
- New Mindset: “I can own assets that pay me while I sleep.”

### 3 Mindset Shifts for Financial Freedom:

- Shift from Active to Passive Income – Your paycheck is temporary, but rental income is ongoing.
- Learn to Leverage Other People’s Money – You don’t need your own money to invest.
- Think Long-Term – Buy & hold real estate creates generational wealth.

### Quick Tip:

Start thinking like an owner, not an employee. Investors focus on assets, not hours.
